

**Cleaner for the removal  
of cured polyurethane  
residues on equipment,  
surfaces and tools.**

#### APPLICATIONS

- Removal of all kinds of polyurethanes on equipment, surfaces and tools.
- Used for small parts that can be immersed.

#### PROPERTIES

- Mixture of acid-free, non-chloride solvents.
- Low aggressiveness
- Excellent performance.
- After filtration the product can be reused.
- Water soluble

### PACKAGING

#### PLASTIC JERRYCAN

10 kg

### TECHNICAL DATA (Typical values)

<b>Colour</b>	Colourless to light yellow
<b>Viscosity</b>	10 mPas
<b>Density</b>	0.986 g/ml
<b>Agressivity</b>	Mild, does not corrode aluminium
<b>Solubility</b>	Completely in water

### PROCESSING

- Impregnate the equipment that needs to be cleaned by immersing it in a bucket with PC® PU Cleaner.
- Impregnate the surface that needs to be cleaned by applying PC® PU Cleaner on the surface with a well-soaked cloth.
- Allow the cleaner to act on the cured resin until it softens.
- The residu can easily be cleaned by compressed air, a high-pressure cleaner or mechanically.
- Rinse the surface with water or acetone.

### STORAGE

#### Shelf life

2 years after production date in the original, unopened and undamaged packaging, stored in a dry and cool place.

### PRECAUTIONS AND SAFETY RECOMMENDATIONS

- Avoid contact with the skin and the eyes.
- Wear protective gloves, clothes and glasses.
- For more information: consult the Safety Data Sheet (SDS).
