Product is not combustible or explosive. No particular hazards known. In case of a fire, avoid inhalation of combustion products.

5.3. Advice for fire-fighters

Product itself is non-combustible; fire extinguishing method of surrounding areas must be considered. The degree of risk is governed by the burning substance and the fire conditions. Dispose of fire debris and contaminated extinguishing water in accordance with official regulations. Protective helmet with visor, fireproof clothes, protective gloves (dielectric and fireproof), face mask which covers fire-fighter's face completely and in case of very large amounts of smoke, use a clean air breathing apparatus (tube and mask).

6. ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

Hand protection

Nitrile coated cotton gloves. (e.g. EN 388, 374) (Recommended: Protective index 6, corresponding > 480 minutes of permeation time according to EN 374): E.g. nitrile rubber (0.4 mm), chloroprene rubber (0.5 mm), butyl rubber (0.7 mm) etc. Supplementary note: The specifications are based on tests, literature data and information of glove manufacturers or are derived from similar substances by analogy. Due to many conditions (e.g. temperature) it must be considered, that the practical usage of a chemical-protective glove in practice may be much shorter than the permeation time determined through testing.

Body protection

Body protection must be chosen based on level of activity and exposure, light protective clothing.

General safety and hygiene measures

Avoid contact with the skin, eyes and clothing. Avoid inhalation of dusts and vapors. In order to prevent contamination while handling, closed working clothes and working gloves should be used. Handle in accordance with good building materials hygiene and safety practice. When using, do not eat, drink or smoke. Hands and/or face should be washed before breaks and at the end of the shift. At the end of the shift the skin should be cleaned and skin-care agents applied. Gloves must be inspected regularly and prior to each use. Replace if necessary (e.g. pinhole leaks). Contaminated equipment or clothing should be cleaned after each use or disposed of. Do not smoke in working area!
